

## **Branch : Mechanical and Production**

**Code :** BODREP

**Option :** Bodywork repair

**Level :** Bac Pro

**Prerequisites:**

**Opportunities:**

Many graduates are in charge of a body repair and/or body painting unit.

**Description :**

Holders of this vocational baccalaureate are responsible for receiving customers and taking delivery of the vehicle, identifying or replacing damaged parts, checking and repairing structures, preparing and painting bodywork parts and bringing the vehicle up to standard before completing the work. These professionals integrate a quality approach into all their activities. They may work in any type of motor vehicle body repair company.

**Quality and competences :**

The aim of this vocational baccalaureate is to train technicians who can work in any repair company: in independent workshops, workshops attached to a manufacturer's network or integrated into a company or community, or in rapid repair workshops.

---

During their training, students become familiar with all the tasks involved, from welcoming customers to repairing damaged parts and repairing bodywork structures.

He or she acquires the techniques for painting a bodywork component by mastering the various stages of preparation, execution and control.

The training also includes bringing the vehicle back into conformity and completing the work.

This vocational baccalaureate also enables the student to understand the new environmental constraints which require scrupulous respect for the rules of prevention of professional risks in terms of ergonomics, hygiene, safety and environmental protection.
