

Branch : Leather professions

Code : SADUPH

Option : Saddlery upholstery

Level : Bac Pro

Prerequisites :

Opportunities:

The holders of the saddlery and upholstery option carry out all the actions specific to the production of the prototype in saddlery. They make all the templates and then assemble the prototype.

Description :

Holders of this vocational baccalaureate are mainly employed as prototypists in design offices in the luxury goods and small series sectors or as fitters. They produce product prototypes and small series in leather goods companies.

Quality and competences :

The holders of the vocational baccalaureate in leather trades, saddlery and upholstery option, must take into account the indications given by the stylist or model maker, the technical constraints (time, raw materials) and the production costs. These professionals ensure the quality of the materials and define the cutting process. They check the aesthetic, functional and technical conformity of the piece produced and draw up or adapt the technical data sheets which will be sent to the methods office before production is launched.

With the increase in relocations abroad, technicians are more versatile and must adapt to all phases of prototyping: cutting, stitching and assembly of the garment.

Holders of this vocational baccalaureate can progress to production control, management and management positions in the design office.
