

Branch : Agriculture and Livestock

Code : COMAAE

Option : Conduct and management of the agricultural enterprise

Level : Bac Pro

Prerequisites :

Opportunities:

They may be required to manage a team of employees. Their role consists not only of knowing how to make decisions but also of anticipating and adapting in a rapidly changing context. Finally, as entrepreneurs, the ability to analyse and manage is necessary.

Description :

This vocational baccalaureate trains managers of agricultural enterprises or highly qualified employees. This is a multi-skilled profession. Graduates must be able to manage production cycles, whether plant or animal, thanks to their detailed knowledge of the agroecosystem. To do this, they have access to agro-equipment, decision support tools (DST) and information and communication technologies (ICT).

Quality and competences :

The core of the profession is still characterised by the individual's relationship with living organisms and his or her ability to manage plant and animal production cycles, thanks to an acute sense of observation and a global vision of the functioning of the agroecosystem.
